43      ]
44    }
45  ]
46 }
```

You can edit the package name

Package com.example

Class name Example

Give a Meaningful Class Name

Source type:

☐ JSON Schema ☒ JSON

Annotation style:

☒ Jackson 2.x ☐ Jackson 1.x

☐ Gson ☐ None

☐ Generate builder methods

☐ Use primitive types

☐ Use long integers

☒ Use double numbers

☐ Use Joda dates

☐ Use Commons-Lang3

☒ Include getters and setters

☐ Include constructors

☐ Include hashCode and equals

☒ Include toString

☐ Include JSR-303 annotations

☒ Allow additional properties

☒ Make classes serializable

☐ Make classes parcelable

Property word delimiters: -
